Pennsylvania Resources Council is excited to host the Wild & Scenic Film Festival for the 6th consecutive year on October 15, 2020. This online, virtual event features a series of thought-provoking and breathtaking local, national, and global short films exploring the protection and restoration of wild lands and waters, climate change, environmental justice, litter prevention and much more. These films demonstrate the powerful impact individuals can make in support of our global and local environment, with the hope that the films will inspire Pennsylvanians to take action in their own communities.

Please contact Carol Butler to learn more and discuss how you can participate in the Wild & Scenic Film Festival.
