## FreeGarden EARTH

The FreeGarden EARTH compost bin is an efficient, durable, and economical tool that saves municipalities money and provides many benefits for homeowners and gardeners.

Manufactured of 100% recycled content, its single-unit main body construction means no difficult assembly, and no structural integrity issues in extreme weather conditions.

The animal and pest resistant lid twists for variable ventilation control, and covers a large 19.5" (49.5 cm) opening that offers easy, generous access to add material and maintain the pile.

FreeGarden EARTH compost bins fit easily in the back seat of a regular sedan for easy transport.

Backyard composting is an effective and economical organics diversion solution. The FreeGarden EARTH is available to organizations and municipalities as a bulk order or through our customized one day truckload sale distribution program to the public engages the community in achieving your organization's goals for a healthy environment.
